

Charlotte

0.1 Charlotte – Responsive HTML5 Template

[Support](#)[Our Blog](#)

Thank you for purchasing this theme. If you have any questions that are beyond the scope of this help file, please feel free to start new ticket on this page. Thanks so much!

Scope of free support

We can help you with:

1. Responding to questions or problems regarding the item and its features
2. Fixing any discovered item's bugs
3. Providing updates to ensure compatibility with new software versions

0.1 HTML Structure

This theme is built upon bootstrap framework and is fully responsive. It adapts to window resolution and looks good on all devices including iPad and iPhone.

See for yourself (resize your browser).

If you would like to read more
about bootstrap framework click here :

[Bootstrap Documentation](#)

Grid System and Single row structure

The default Bootstrap grid system utilizes 12 columns. It's responsive grid and adapts to viewport. Below 767px viewports, the columns become fluid and stack vertically. The fluid grid system uses percents instead of pixels for column widths. Each row always include 12 columns (for example col-md-8 + col-md-4 = col-md-12).
Bootstrap documentation: [here](#)

Basic grid HTML:

```
1  <div class="row">
2      <div class="col-md-1">.col-md-1</div>
3      <div class="col-md-1">.col-md-1</div>
4      <div class="col-md-1">.col-md-1</div>
5      <div class="col-md-1">.col-md-1</div>
6      <div class="col-md-1">.col-md-1</div>
7      <div class="col-md-1">.col-md-1</div>
8      <div class="col-md-1">.col-md-1</div>
9      <div class="col-md-1">.col-md-1</div>
10     <div class="col-md-1">.col-md-1</div>
11     <div class="col-md-1">.col-md-1</div>
12     <div class="col-md-1">.col-md-1</div>
13     <div class="col-md-1">.col-md-1</div>
14     <div class="col-md-1">.col-md-1</div>
15     <div class="col-md-1">.col-md-1</div>
16     <div class="col-md-1">.col-md-1</div>
17     <div class="col-md-1">.col-md-1</div>
18     <div class="col-md-1">.col-md-1</div>
19 </div>
20
21 <div class="row">
22     <div class="col-md-8">.col-md-8</div>
23     <div class="col-md-4">.col-md-4</div>
24 </div>
25
26 <div class="row">
27     <div class="col-md-4">.col-md-4</div>
28     <div class="col-md-4">.col-md-4</div>
29     <div class="col-md-4">.col-md-4</div>
30 </div>
31
32 <div class="row">
33     <div class="col-md-6">.col-md-6</div>
34     <div class="col-md-6">.col-md-6</div>
35 </div>
```

Page structure

Below you will find default page structure :

```
1  <!DOCTYPE html>
2

0.1 CSS Files and Structure

If you would like to edit the color, font, or style of any elements, you would do the following:

```
1 #primaryContent a {color: #someColor;}
```

If you find that your new style is not overriding, it is most likely because of a specificity problem. Scroll down in your CSS file and make sure that there isn't a similar style that has more weight.

I.E.

```
1 #wrap #primaryContent a {color: #someColor;}
```

So, to ensure that your new styles are applied, make sure that they carry enough "weight" and that there isn't a style lower in the CSS file that is being applied after yours.

Colors

The theme includes a css file wich you can use to edit the colors.
You just need to add the corresponding CSS file to the head of the page like this:

```
1 <head>
2   (..)
3   <link rel="stylesheet" type="text/css" href="css/motive.css">
4   (..)
5   </head>
```

Main Menu structure

Just change brand name, upload your logo to images/content/ folder and you're ready to go!

```
1 <nav class="navbar ct-navbar navbar-default yamm ct-navbar--fadeIn" role="navigation">
2   <div class="container">
3
4     <div class="ct-navbarContainer">
5
6       <div class="navbar-header">
7
8         <a class="navbar-brand" href="index.html">
13
14        <li role="presentation" class="dropdown">
15          <a class="dropdown-toggle" href="about.html" role="button" aria-ex
16            Home <span class="caret"></span>
17          </a>
18          <ul class="dropdown-menu">
19            <li>
20              <div class="yamm-content">
21                </div>
22              </li>
23            </ul>
24          </li>
25          <li><a href="contact.html">Contact Us</a></li>
26        </ul>
27
28        <ul class="nav navbar-nav yamm ct-navbar--right">
29          <li><a href="login.html">My Account</a></li>
30
31        </ul>
32
33      </div>
34
35    </div>
36  </nav>
```

In order to create mega menus read the documentation here:
[Yamm 3 Documentation](#)

Icons

We've included 360+ font icons.

Awesome Icons – <http://fontawesome.io/icons/>

HTML markup:

```
1 <!-- Awesome Icons -->

```

CSS Files & Structure

We've included 2 files.

bootstrap.css contains Bootstrap 3 Library.

style.css file contains general styles.

1. Snap mobile
2. Sidebar
3. Content
4. Frame box
5. Image box
6. Contact
7. Popup
8. Sliders
9. Animations
10. Food box
11. To Top button
12. Navigations blog
13. Blog section
14. Comments
15. Google Map
16. Loader

Utilities

Utility classes are low-level structural and positional traits. Utilities can be applied directly to any element, multiple utilities can be used together and utilities can be used alongside component classes.

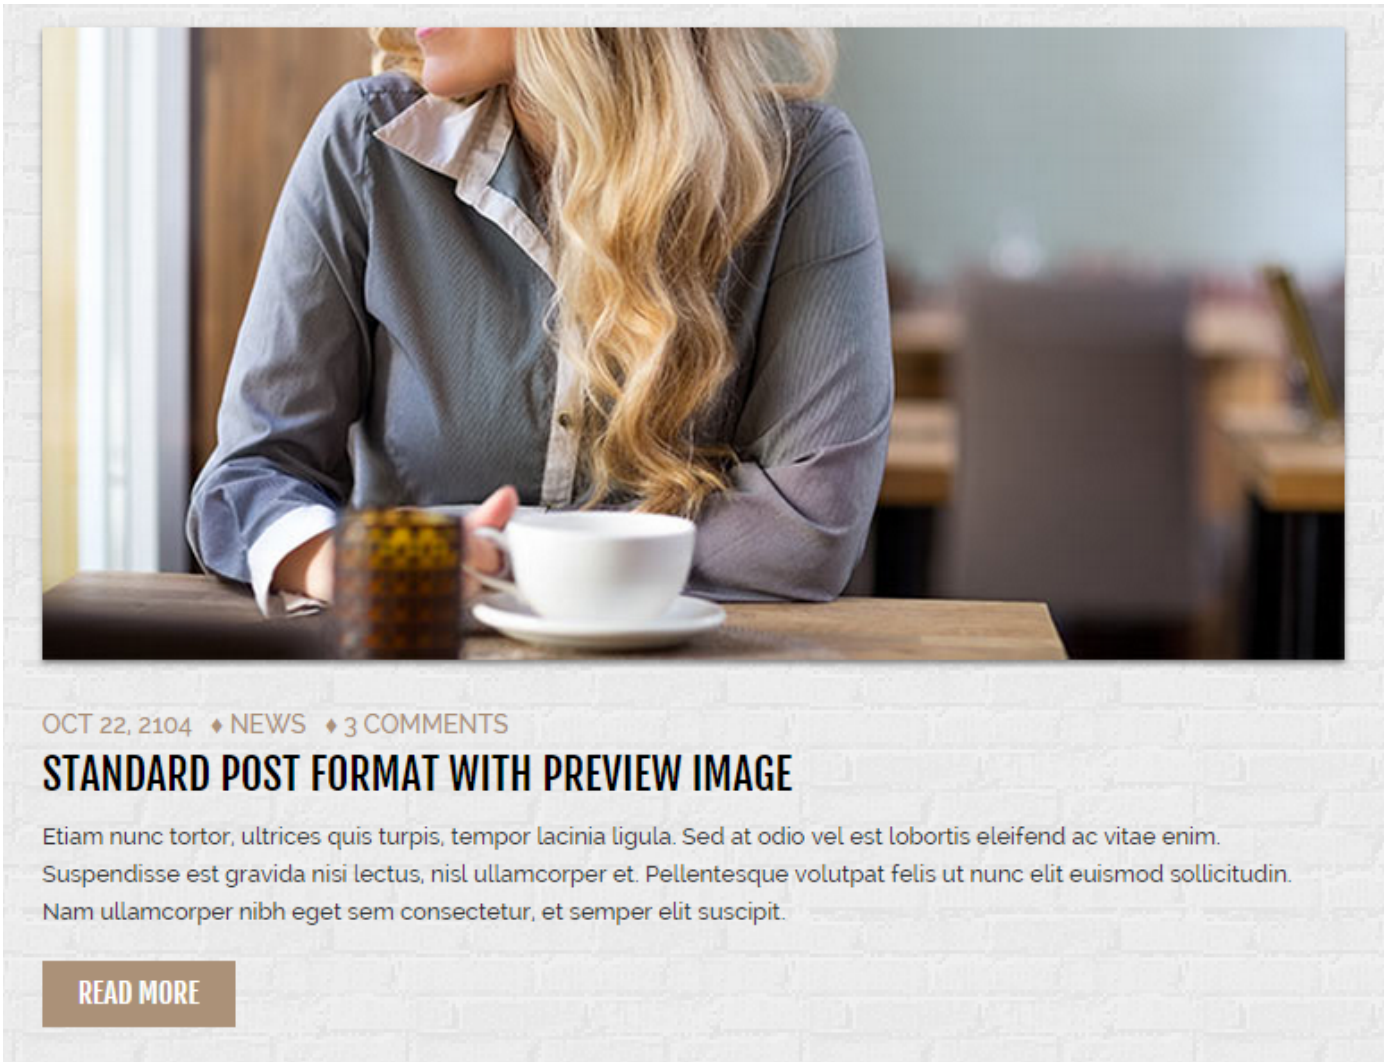

Utilities are intended for frequently used CSS properties and patterns, like: floats, containing floats, vertical alignment, text truncation. Relying on utilities can help to reduce repetition and provide consistent implementations.

- Charlotte uses utilities for the following categories:
- Typography
- Display Types
- Paddings
- Margins

- Line height
- Borders
- Colors
- Transform
- Section elements

0.1 Blog

Charlotte comes with the following template for blog posts

Blog post

You can use it with the following HTML markup:

```
1  <section class="ct-frame ct-frame--white">
2
3      <article class="ct-blogItem">
4          <div class="ct-blogItem ct-blogThumbnail">
5              
6          </div>
7          <div class="ct-blogItem ct-innerMargin">
8              <div class="ct-blogItem ct-entryMeta">
9                  <span class="ct-blogItem ct-entryDate">oct 22, 2104</span>
10                 <span class="ct-blogItem ct-catLinks">♦ <a href="#"> news</a></span>
11             </div>
12         </div>
13     </article>
</section>
```

```
14         <span class="ct-blogItem ct-entryComments">♦ <a href="#"> 3 con
15     </div>
16 </h3>

39             </p>
40             </div>
41         </div>
42     </li>
43     <li>
44         <div class="media">
45             <a href="#">
47             <label class="ct-entryDateSecond">oct 22, 2104</label>
48             <span class="ct-diamondSymbol">◆</span><a href="#">
49             <h4 class="ct-media-heading ct-u-font2">jane s
50             <p>
51                 Reoin euismod consectetur quam ac lacinia.
52             </p>
53             </div>
54         </div>
55     </li>
56 </ul>
```

0.1 Pagination

Display your posts on several pages and navigate between them with simple pagination.

Pagination

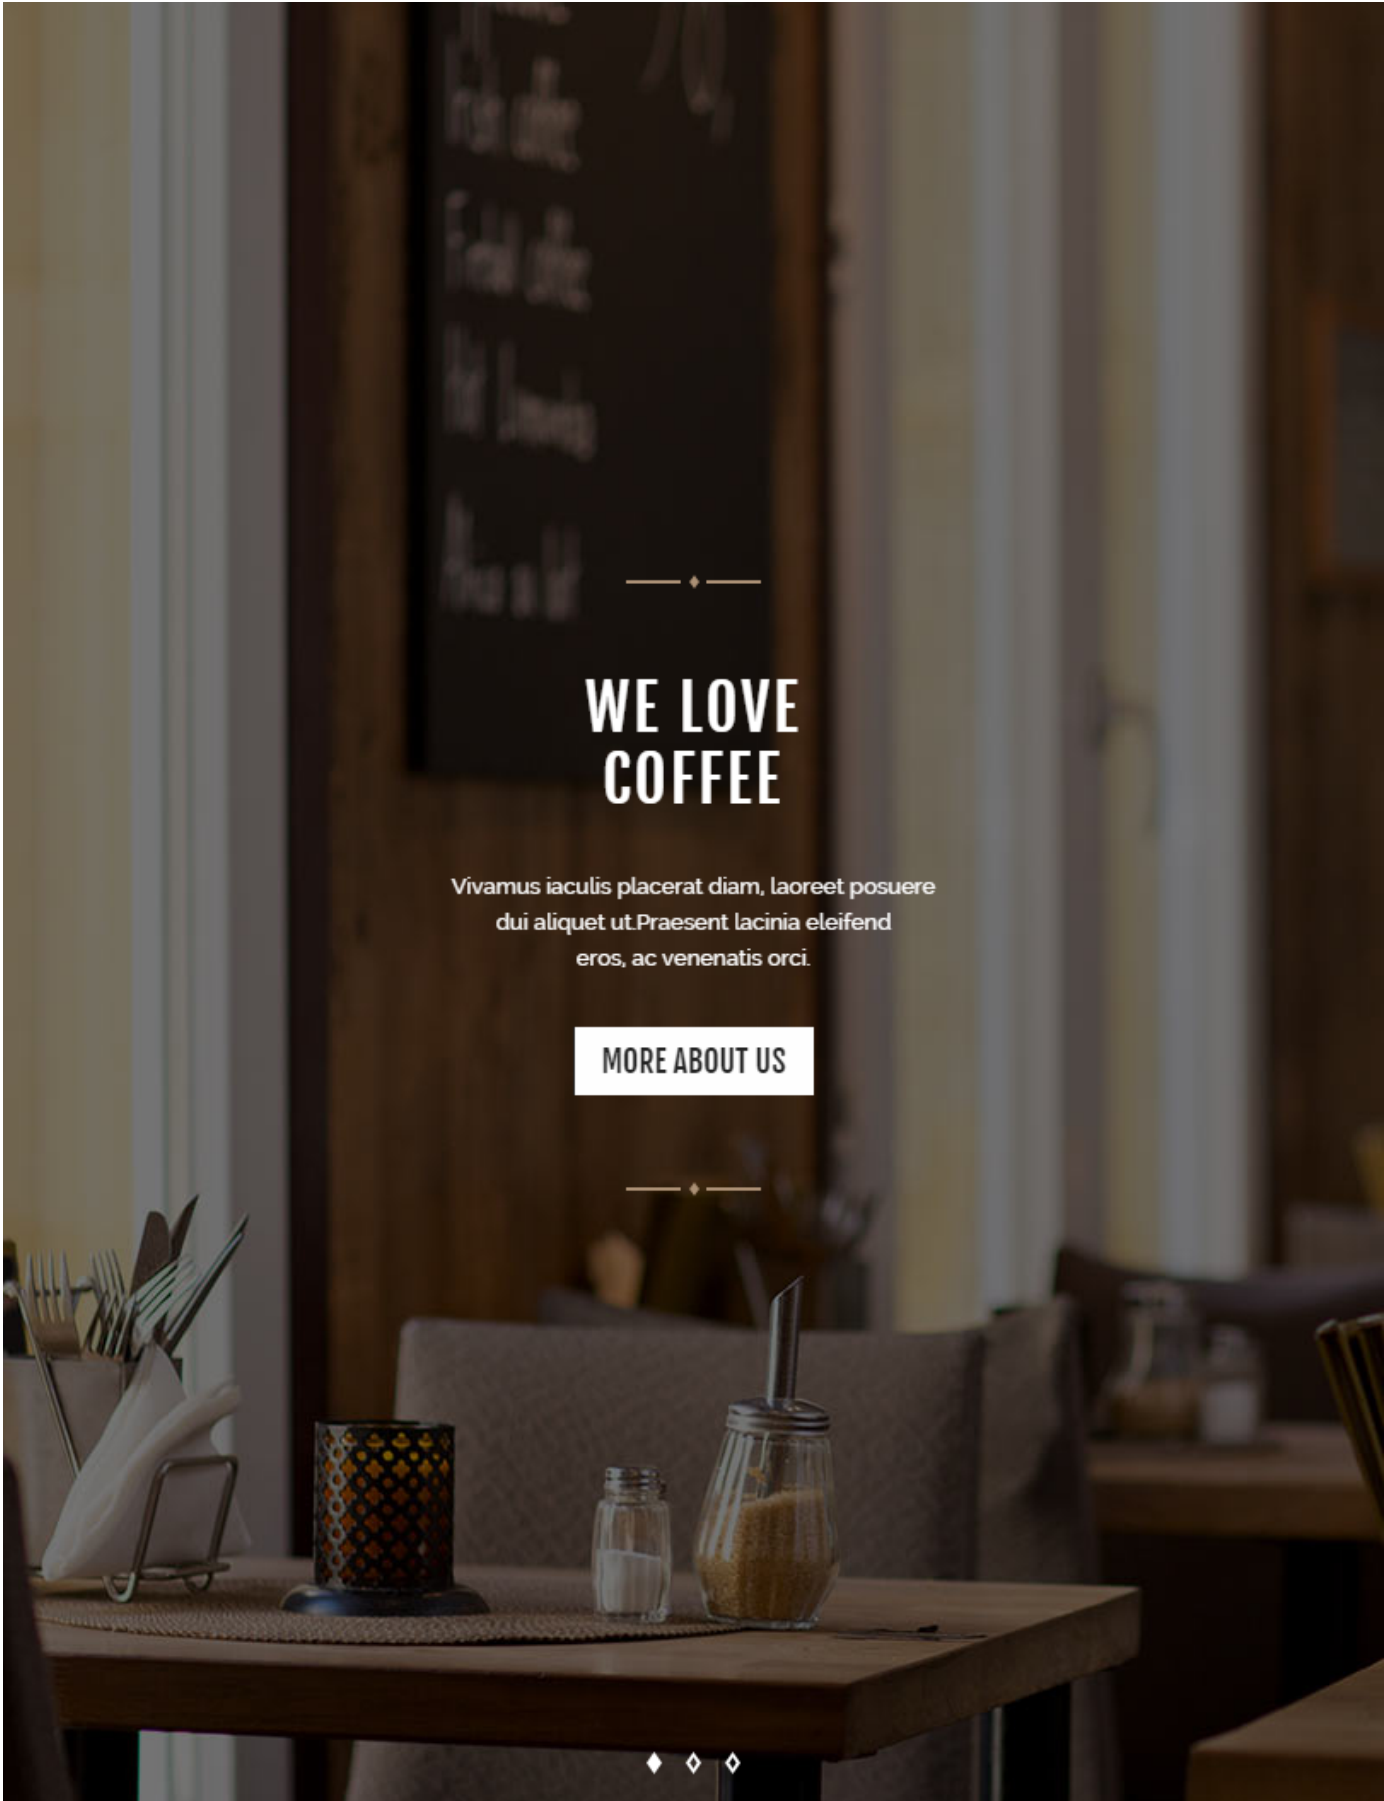

Use for it simple HTML markup:

```
1 <div class="row ct-navigation-blog-outer">
2     <div class="col-md-6 col-xs-12 text-left">
3         <div class="ct-navigation-blog">
4             <a href="#" class="btn btn-lg btn-button--dark"><i class="fa fa-lc
5             </div>
6         </div>
7     </div>
8     <div class="col-md-6 col-xs-12 text-right">
9         <div class="ct-navigation-blog">
10             <a href="#" class="btn btn-lg btn-button--dark">newer posts <i cl
11             </div>
12     </div>
```

0.1 Slider

We use several types of sliders in Charlotte.

Main Slider

Main slider

HTML markup:

```
1 <div class="ct-js-owl " data-animations="true" data-height="100%" data-snap-ignore="tr
2
3     <div class="item">
4         <hr class="hr-custom ct-js-background animated" data-fx="fadeInDown" d
5         <h2 class="ct-u-font2 text-uppercase animated" data-fx="flipInY">We lo
6         <p class="animated" data-fx="fadeIn">Vivamus iaculis placerat diam, lo
7         <a href="about.html" class="btn btn-lg btn-default animated" data-fx='
8         <hr class="hr-custom ct-js-background animated ct-u-paddingTop60" data
9
10    </div>
11    <div class="item">
12        <hr class="hr-custom ct-js-background animated" data-fx="fadeInDown" d
13        <h2 class="ct-u-font2 text-uppercase animated" data-fx="flipInY">Coffe
14        <p class="animated" data-fx="fadeIn"> Donec fermentum eros at mauris n
15        <a href="menu.html" class="btn btn-lg btn-default animated" data-fx="f
16        <hr class="hr-custom ct-js-background animated ct-u-paddingTop60" data
17
18    </div>
19    <div class="item">
20        <hr class="hr-custom ct-js-background animated" data-fx="fadeInDown" d
21        <h2 class="ct-u-font2 text-uppercase animated" data-fx="flipInY">Cater
22        <p class="animated" data-fx="fadeIn">Aliquam erat volutpat. Morbi nisl
23        <a href="menu.html" class="btn btn-lg btn-default animated" data-fx="f
24        <hr class="hr-custom ct-js-background animated ct-u-paddingTop60" data
25
26    </div>
27 </div>
```

Gallery

gallery slider

HTML markup:

```
1 <div class="ct-js-owl ct-js-popupGallery" data-items="2" data-single="false" data-navi
2     <div class="item ct-u-padding10">
```

```
3         <a href="assets/images/demo-content/gallery-full-1.jpg" class=
4         <a href="assets/images/demo-content/gallery-full-2.jpg" class=
5
6     </div>
7
8     <div class="item ct-u-padding10">
9         <a href="assets/images/demo-content/gallery-full-3.jpg" class=
10        <a href="assets/images/demo-content/gallery-full-4.jpg" class=
11
12    </div>
13
14    <div class="item ct-u-padding10">
15        <a href="assets/images/demo-content/gallery-full-5.jpg" class=
16        <a href="assets/images/demo-content/gallery-full-6.jpg" class=
17
18    </div>
19</div>
```

Gallery Simple

Simple gallery

HTML markup:

```
1 <div class="ct-js-owl ct-gallery--shadow" data-animations="true" data-height="100%">
2     <div class="item">
3 Example of button
4 </a>
5 </li>
```

And of the following variations:

Types of buttons:

- btn
- btn-sm
- btn-md

Different looks:

- btn-default
- btn-inverse
- btn-button-brown
- btn-button-dark

Button

0.1 Social Buttons

There are two available types of social buttons:

- rounded buttons – it's a default type, which will be displayed when you use in markup class *ct-socials*

Rounded socials buttons

- squared buttons – can be used with class *ct-socials-square*

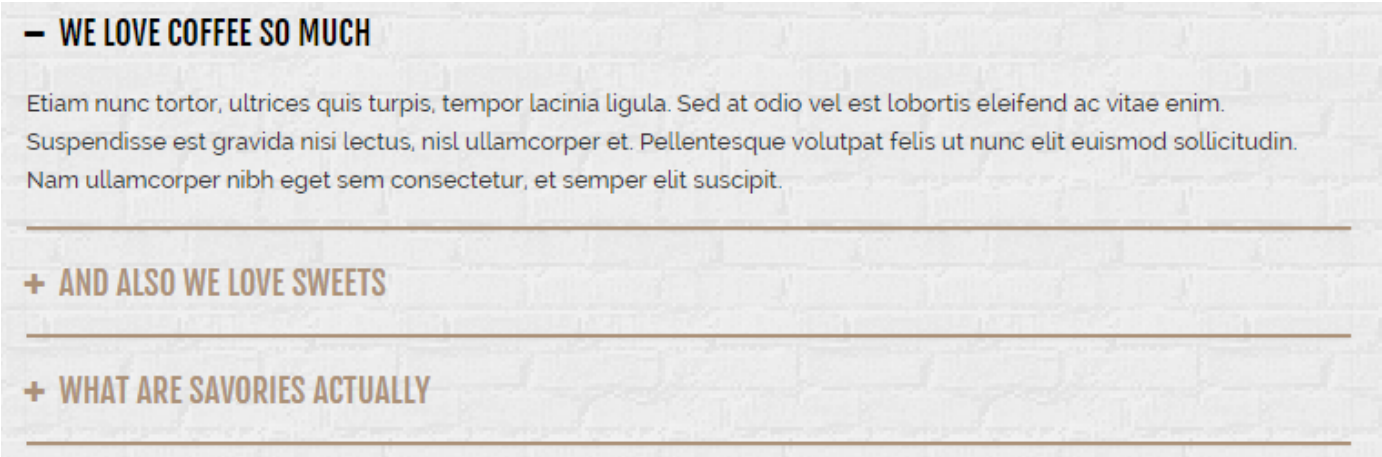

Squared socials buttons

Both types use the following basic HTML markup:

```
1 <ul class="list-unstyled list-inline ct-socials animated" data-fx="fadeInUp" data-time
2
3     <li>
4         <a href="https://www.facebook.com/createITpl" data-toggle="tooltip"
5             data-placement="top" title="Facebook"><i class="fa fa-fw fa-fac
6
7     </li>
8     <li>
9         <a href="https://twitter.com/createitpl" data-toggle="tooltip" dat
10            title="Twitter"><i class="fa fa-fw fa-twitter"></i></a>
11
12    </li>
13    <li>
14        <a href="#" data-toggle="tooltip" data-placement="top" title="Goog
            class="fa fa-fw fa-google-plus"></i></a>
15
16    </li>
17 </ul>
```

0.1 Accordion

Check our beautiful accordion!

Accordion

You can use it with simple HTML markup:

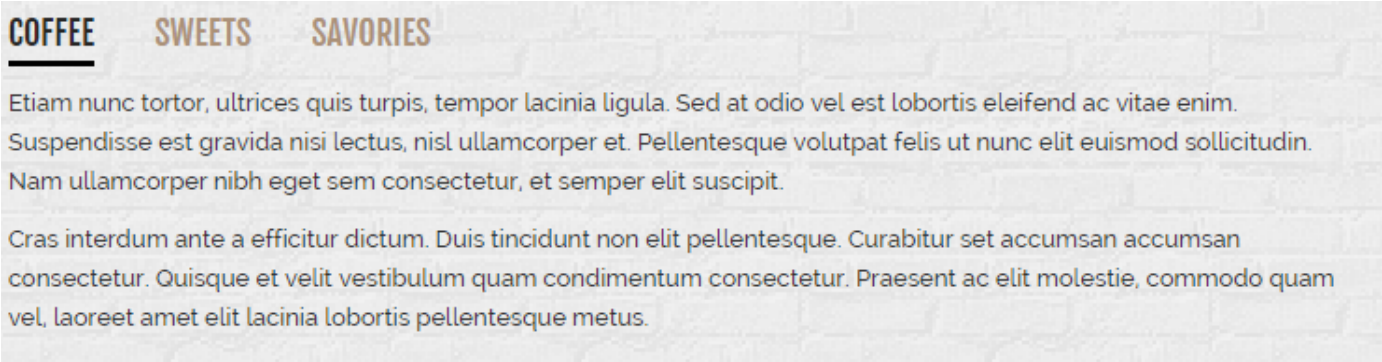

```
1  <div class="panel-group" id="accordion" role="tablist" aria-multiselectable="true">
2
3
4      <div class="panel panel-default">
5          <div class="panel-heading" role="tab" id="headingOne">
6              <h4 class="panel-title">
7                  <a data-toggle="collapse" data-parent="#accordion" href="#">
8                      we love coffee so much
9                  </a>
10             </h4>
11         </div>
12         <div id="collapseOne" class="panel-collapse collapse in" role="tabpanel">
13             <div class="panel-body">
14                 Etiam nunc tortor, ultrices quis turpis, tempor lacinia ligula. Sed at odio vel est lobortis eleifend ac vitae enim.
15                 Pellentesque volutpat felis ut nunc elit euismod sollicitudin. Nam ullamcorper nibh eget sem consectetur, et semper elit suscipit.
16             </div>
17         </div>
18     </div>
19
20     <div class="panel panel-default">
21         <div class="panel-heading" role="tab" id="headingTwo">
22             <h4 class="panel-title">
23                 <a class="collapsed" data-toggle="collapse" data-parent="#accordion" href="#">
24                     and also we love sweets
25                 </a>
26             </h4>
27         </div>
28         <div id="collapseTwo" class="panel-collapse collapse" role="tabpanel">
29             <div class="panel-body">
30                 Etiam nunc tortor, ultrices quis turpis, tempor lacinia ligula. Sed at odio vel est lobortis eleifend ac vitae enim.

0.1 Javascript

All javascripts are placed in folder /js. In main.js file we implement all functions calls.

This theme uses following Javascript files:

- HTML/assets/js/jquery.min.js – JQuery Plugin
- HTML/assets/js/bootstrap.min.js – Bootstrap Plugin
- HTML/assets/js/placeholder.min.js
- HTML/assets/js/easing.1.3.js
- HTML/assets/js/device.min.js
- HTML/assets/js/jquery.browser.min.js
- HTML/assets/js/snap.min.js – Snap Plugin is for responsive menu
- HTML/assets/js/jquery.appear.js
- HTML/assets/js/masonry.min.js – This is using in home page and in gallery
- HTML/assets/plugins/owl/owl.carousel.min.js – slider plugin
- HTML/assets/plugins/owl/init.js

- HTML/assets/js/portfolio/imagesloaded.js – Needed for gallery
- HTML/assets/plugins/magnific-popup/jquery.magnific.min.js – Needed for gallery, using when you want to see a big image after click on thumbnail
- HTML/assets/plugins/magnific-popup/init.js
- HTML/assets/js/main.js – Main scripts
- HTML/assets/js/less.min.js

Google Map (GMAP3 Plugin)

This is google map with custom marker, you can define couple parameters:

- data-location – address to show
- data-height – map height (if undefined height will be 220px)
- data-offset – by how many map should be repositioned from marker center point (default -30)

It uses gmap3 plugin.

Documentation: [here](#)

HTML Markup:

```
1 <div class="ct-googleMap" data-location="Narbutta 24, Warsaw" data-zoom="15" data-height="220px">
```

All javascript code can be found in js/main.js file.

jquery.appear

This plugin call function when element appear in viewport. This is used in custom animation, progress bars, counter timer.

Documentation: <https://github.com/bas2k/jquery.appear/>

```
1 if (jQuery().appear) {
2     if (device.mobile()) {
3         // disable animation on mobile
4         jQuery("body").removeClass("withAnimation");
5     } else {
6         jQuery('.withAnimation .animated').appear(function () {
7             jQuery(this).each(function () {
8                 jQuery(this).addClass('activate');
9                 jQuery(this).addClass($(this).data('fx'));
10            });
11        }, {accY: -150});
12    }
13 }
```

Charts.js

This plugin is used to make graphics.
